Google x RCH EBC Demo
Enhance Customer Experience with Google AI

AI hasn't just arrived - it has redefined the benchmark for consumer experiences

Personalized results

Actions done on your behalf

Immersive experiences

What if you could transform your customer's experiences from frustration into loyalty?

Find exactly what's needed

Based on my recent health assessment, which membership tier covers the programs I'm cleared for?"

Fix things fast, the first time

I need help troubleshooting my connectivity issues. Check my account and show me the steps to fix it"

Engage in preferred ways

I'm uploading a photo of my insurance card & a bill. Why is there a balance due?"

Build a relationship that lasts

I've been a brand loyalist for 3 years. Based on my driving history and lifestyle, what upcoming model should I explore?"

With new opportunities come new challenges

- ✓ Turning AI experimentation into measurable outcomes
- ✓ Preparing for tomorrow without jeopardising what works today
- ✓ Mitigating risk, using safe and trusted partner

Customer Experience of the Future

Moving from theory to practice for RCH

DEMO 1

Enlightening Customers with **heightened Patient Experience**

SCENARIO

Through a secure, 24/7 omni channel communication platform, caregivers can seamlessly connect with RCH, accessing vital health insights at their fingertips and fostering a deeper relationship of trust.

Conversational agents and Insights

Gemini Enterprise capabilities

Harnessing the power of Agent Platform

Overcoming Language Barriers in Care

Moving from theory to practice for RCH

DEMO 2

Seamless multi-language patient and doctor communication powered by Gemini

SCENARIO

A doctor and patient speak different languages, creating a communication barrier during their consultation.

How can live, near-real-time speech translation help bridge this gap?

Clinical Voice Translation Pipeline

Real-time multilingual consultation & automated EMR documentation flow

01 / Hearing

Speech Capture

`webkitSpeechRecognition`

- Captures doctor's English clinical dictation
- Real-time, browser-based speech-to-text
- Low-latency streaming of medical queries

02 / Simplifying

Jargon Translation

`gemini-3.5-flash`

- Simplifies complex clinical terms into layperson terms
- Translates dynamically to patient's native tongue
- Outputs structured translation JSON

03 / Vocalising

Patient Voice

`speechSynthesis`

- Plays back translated steps in localised voice accents
- Captures patient responses in their native tongue
- Maps symptoms back to clinical English metrics

04 / Documenting

EMR SOAP Integration

`gemini-3.5-flash`

- Formats complete clinical SOAP medical notes
- Automates ICD-10 & CPT billing code generation
- Generates interactive patient discharge handouts

Thank You
